

Qlik WHS Visualization

The Application was developed at Meridion in 2018, by Johan Bystedt (CEO) and Johan Cervell (Senior Business Consultant). An extension to the BI-Tool Qlik was created which enabled a visualization of data into pictures. The first application was installed at AB Volvo to visualize one of their warehouses.

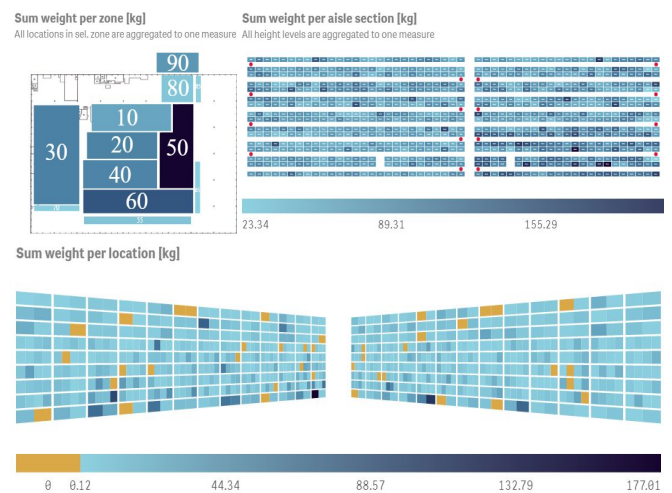

A business value analysis of the application was carried out in 2020, where financial advantages was entailed by streamlining warehousing activities. The analysis also emphasized the value of using the application as a decision support by the customer.

The Application

The Application enables the customer to get a direct insight into their warehousing activities with the goal to streamline the warehousing and reduce the related costs. With help of the application, the user can quickly locate where SKU's with high frequent transactions are located, and take actions to relocate these at more favorable locations, aisles and zones.

The applications also includes analyses that regards ABC categorization, empty locations, fill-rate, stock-take, brand analysis, picking analysis and much more.

Meridion has a global customer base with customers from multiple industries.

The Benefits

-  Identification of improvement areas in the warehousing
-  Decision support in order to make warehousing activities more efficient
-  Better overview of the warehousing activities
-  Historical comparison of the efficiency of the warehouse

The Offering

-  Licenses via Meridion Cloud 1,000 SEK/month and user
-  The implementation and development are carried out for 10 days, including warehouse mapping, workshops and pre-analysis
-  You provide data including location naming and logic, quantities, transactions, and more
