

Automation of Exchange Rates

Having the right exchange rate varies from day to day. It is a monotonously and time consuming job to update M3 each time that occurs. In order to ease and exclude this manually, and at the same time secure that the correct exchange data is being used, Meridion has developed an automatic API flow for exchange rate. This can be deployed both on prem and in Cloud edition.

The Solution

The solution updates CRS055 in M3 via API's from any optional Central Bank. The solution is adapted to both the current installation and the future one of the customer. The responsible person is informed via email if a exchange rate change occurs outside the given interval.

Among our customers are **SCANIA**, **GA Lindberg** and **Swegon** using this solution.

The Benefits

-  Updated exchange rate data
-  Obtain the correct data
-  Decreased manual labor
-  Overview and updates of exchange rate changes

The Offering

-  30 000 SEK
-  Development of the solution for 3 days, including touch-base meetings, implementation and delivery
-  You provide access to you environment and a go-through of your firewall policy
